

ENERGY MANAGEMENT SYSTEM	EP Energy Policy	BORMIOLI LUIGI <small>GLASSMAKER</small>
Ed. 1	October 2021	Page 1 of 1

ENERGY POLICY AND STRATEGY

Bormioli Luigi S.p.A. is committed to creating, developing and maintaining an Energy Management System that meets the requirements set out in the UNI EN ISO 50001 standard as a strategic element for achieving the best possible energy efficiency and for sustainable and lasting development.

These goals are pursued by way of:

- setting energy performance goals,
- support to guarantee availability of the information and resources required to achieve the energy performance goals,
- optimisation of energy consumption and reduction of greenhouse gas emissions, including by purchasing energy from renewable sources,
- support to purchase efficient technologies and services that improve energy performances,
- support to consider improvement of energy performances in the context of planning activities.

Bormioli Luigi S.p.A. constantly evaluates the context in which it operates, consisting of a global market, with a focus on the environmental sustainability of businesses and governed by a complex legislative system, which sets ever higher performance targets for activities with an energy impact. To that end, Bormioli Luigi S.p.A. annually performs and reviews an evaluation of the significance of its energy uses and an analysis of the risk factors arising from its context.

Bormioli Luigi S.p.A. is committed to implementing a process to continuously improve the energy performances of its processes and products, through planned, constant and systematic application of monitored and virtuous behaviours and working methods that comply with energy requirements.

Bormioli Luigi S.p.A. undertakes to meet its energy-related legislative compliance obligations by adopting dedicated processes and functions that support the timely fulfilment of those obligations.

The organisation, responsibilities, methods and procedures that govern the correct functioning of our Energy Management System are described in the Energy Management Manual which constitutes the guide for putting our policy into operational practice.

In order to facilitate implementation of the Energy Policy and Strategy, Bormioli Luigi S.p.A. annually sets specific goals by way of which to measure itself, with a view to developing and perfecting the Energy Management System. Such goals are accompanied by plans defining the actions required to achieve the goals set, documented in the "Energy Goals Plan" annexed to the Energy Management Manual, together with other relevant actions and projects approved by the Company Management.

Parma, 11 October 2021

The Chairman
Alberto Bormioli
